

We the Australian Democrats support GPA's Federal policy priorities fully.

Agriculture is of vital importance to the people of Australia and our economy. The priorities GPA has are needed to maintain and improve our competitiveness and efficiency in the grains industry. Of note are how many of these priorities are for the benefit of many industries and Australians and are a priority for the Australian Democrats.

We hope to be able to help GPA achieve big wins for Agriculture and Australia in the years to come.

Kind Regards

Luke Arbuckle

Queensland Australian democrats lead candidate
